DITTON SURGERY GARDEN 2025 - PLANT LIST

Dear PPG members,

I took responsibility for the maintenance of the surgery grounds this year and felt we could provide much more than a car park for both patients and staff. We want to create a tranquil space in the grounds of the Practice for patients to take refuge in, a peaceful space for them to think, process information, or talk with a friend.

I did a visual presentation at the last PPG meeting on a very cold evening this January when a few brave souls attended. The aim of this letter is to tell <u>all</u> of you our plans and encourage you to join us in creating this wellbeing garden.

This list of plants is not an exact requirement. I already have access to a number of the species listed below but it is the backbone of the garden we wish to create. We are open to any offers of plants, landscaping materials, etc. It would be great to have such choices!

The garden will be developed in two phases. Phase 'One' is to plant up borders around the car park. This can happen over the next few weeks. The goal is to create a garden with a succession of plants - in flower - throughout the year. We already have some volunteers from the January meeting offering to gift plants, grown them on and their time to help when establishing the beds. With such a large PPG membership I am hoping for more volunteers to commit to helping us. Phase 'Two' extends around the rear of the buildings and will begin once 'One' is completed.

Thank you in advance for showing your support.
